

Tutorial Mozilla Thunderbird

1. Download dan install Mozilla Thunderbird
<https://www.mozilla.org/en-US/thunderbird/>
2. Jalankan dan config thunderbird
Saat pertama kali dijalankan maka akan muncul tampilan berikut

The screenshot shows a window titled "Welcome to Thunderbird" with a close button in the top right corner. The main content area has the heading "Would you like a new email address?". Below this is a text input field labeled "Your name, or nickname" and a "Search" button. A paragraph of text explains that Thunderbird can offer a new email account based on search terms. Below the text is a checkbox and the label "gandi.net". At the bottom, there are two buttons: "Skip this and use my existing email" and "I think I'll configure my account later.".

Pilih Skip this and use my existing email

Mail Account Setup

Your name: Your name, as shown to others

Email address:

Password:

Remember password

Isi nama, alamat email dan password dari email yang akan digunakan

Mail Account Setup ✕

Your name: Your name, as shown to others

Email address:

Password:

Remember password

Configuration found by trying common server names

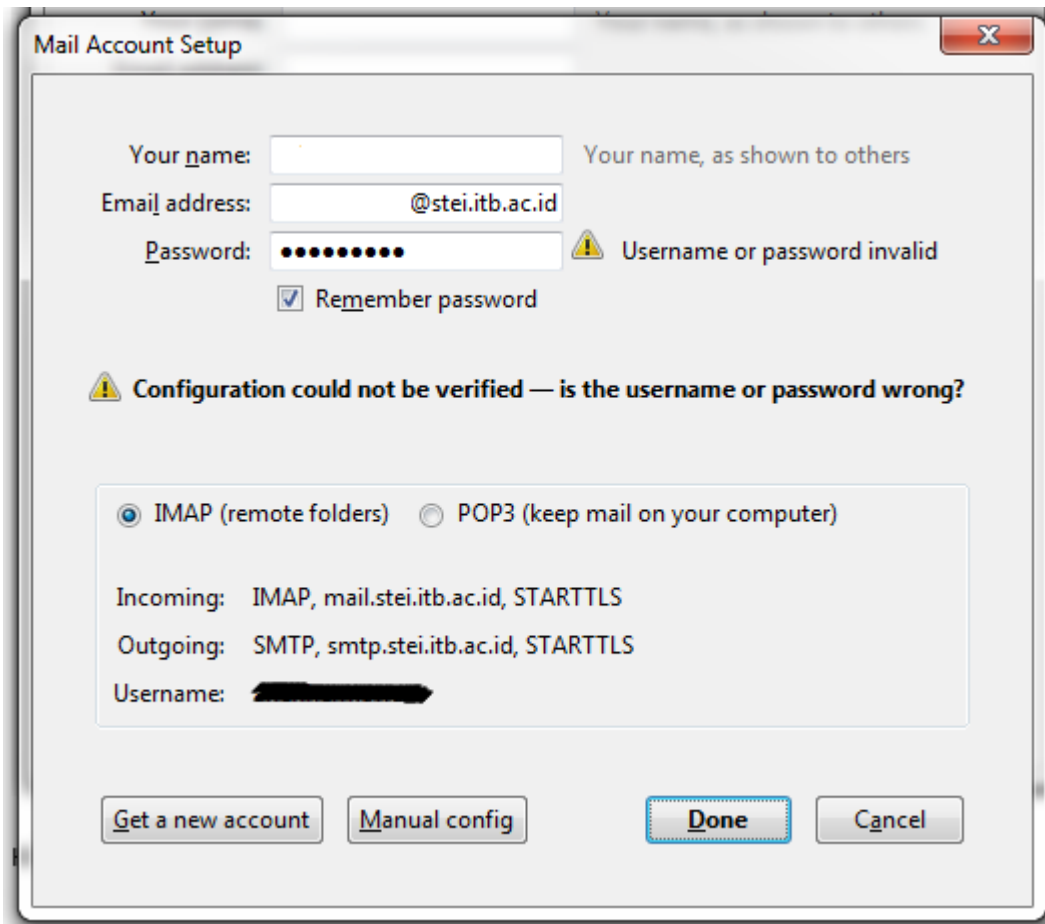

IMAP (remote folders) POP3 (keep mail on your computer)

Incoming: IMAP, mail.stei.itb.ac.id, STARTTLS

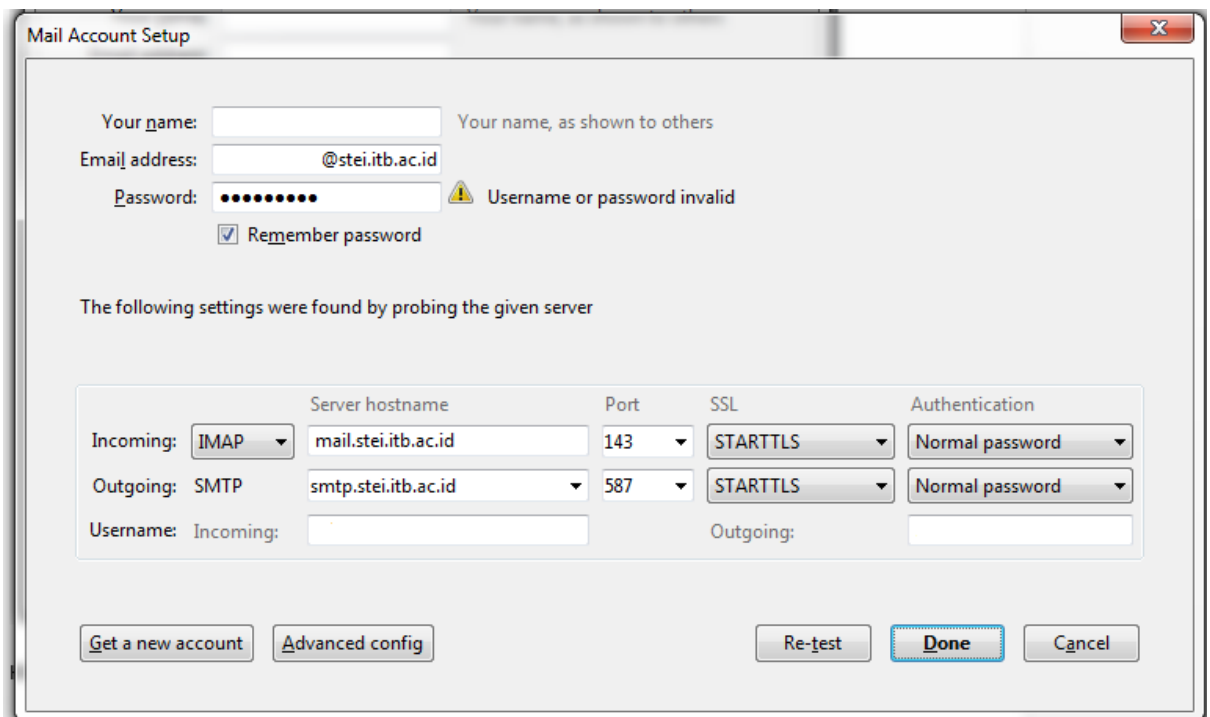

Outgoing: SMTP, smtp.stei.itb.ac.id, STARTTLS

Username:

Klik Done

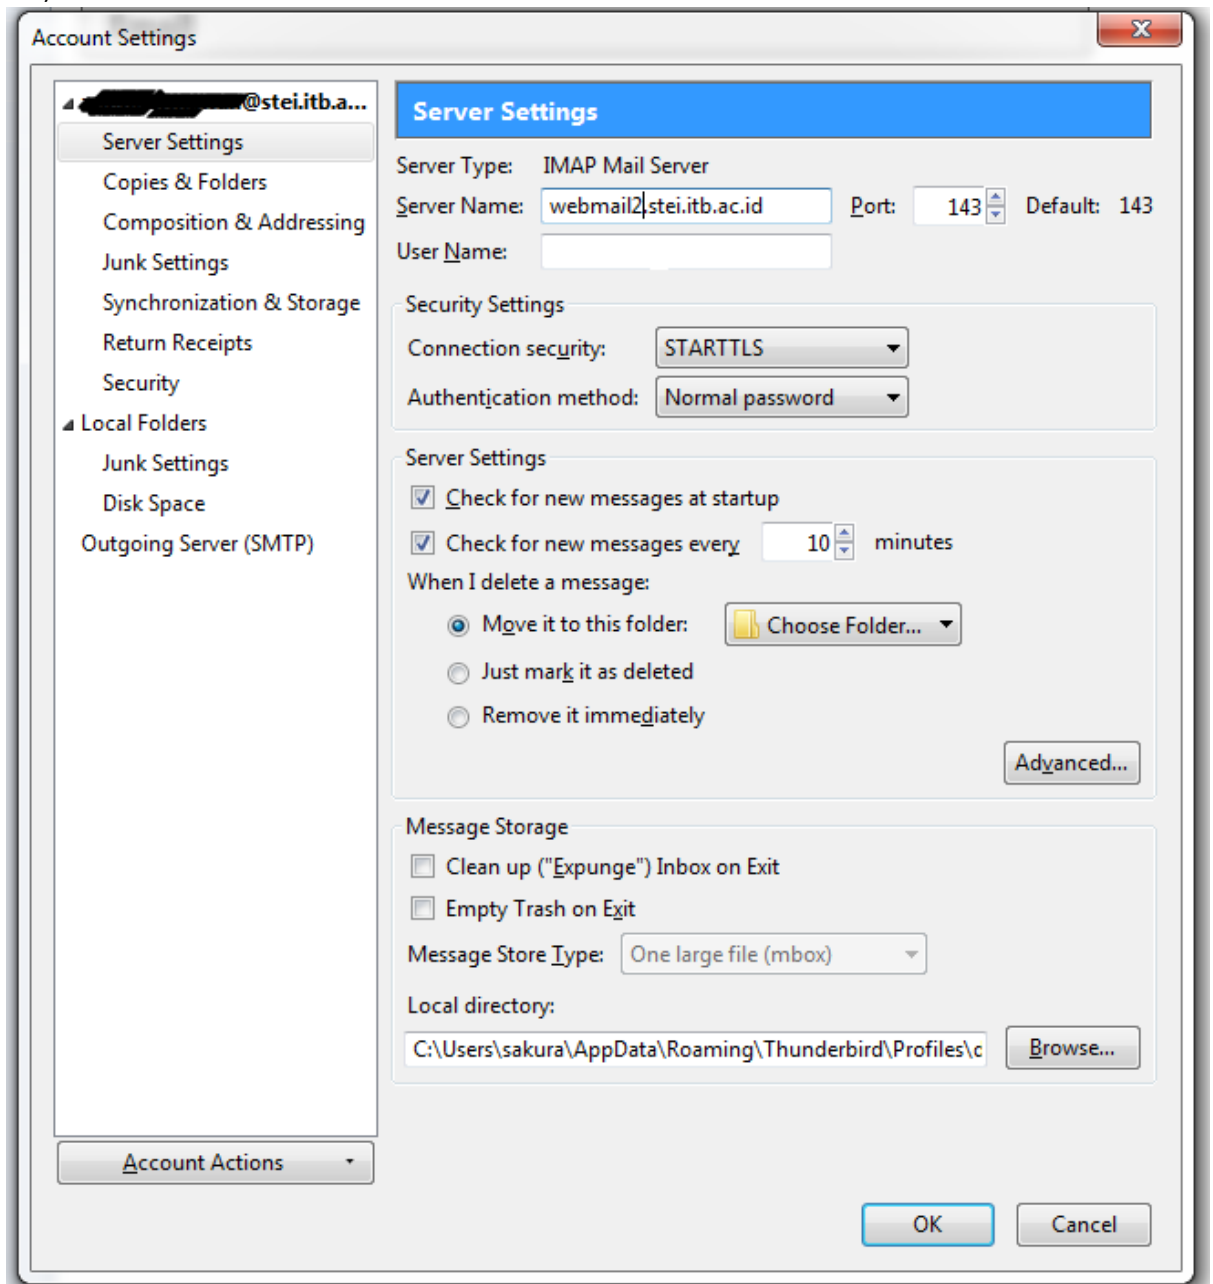

Kemudian klik Manual Config

Ganti tipe SSL untuk Incoming IMAP menjadi none, kemudian klik Re-test dan klik Done

Kemudian klik setting (dengan mengklik kanan alamat email yang terletak di kolom sebelah kiri)

Lalu pilih Server Settings dan ganti Server Name menjadi webmail2.stei.itb.ac.id

3. Kemudian klik Get Messages
